

WMS001-316C Installation Guide

1. Load the mixer into the wall as shown and connect the hot and cold water pipes as shown. Check whether there is any leakage after installation.

2. Fit the wall plate and Handle onto the mixer.

Rough-in inlet and outlet accommodate standard 1/2" male connections; CC (copper), PEX (with threaded adapters,), CPVC threaded fittings.

All mixers must be installed in accordance with applicable plumbing codes (UPC, IPC, or NPC).

All mixers are manufactured to meet ASME A112.18.1 / CSA B125.1 standards and carry WaterMark certification (WM-032384) certification which is equivalent to cUPC certification.
